Pitch

Rhythm

Key Knowledge**What is Digital Music?**

Digital music is made using a computer or other device. Digital music allows the computer to copy the sound made by the instruments and combine them together to make a piece of music.

How Can I change how my music sounds?

You can change how your digital music sounds in many ways. One way is to increase the tempo of the music or vary the volume of each instrument in the piece.

What is meant by the tempo of music?

Tempo is measured by Beats Per Minute (BPM). One beat every second is 60 BPM.

Chrome Music Lab

-On Chrome Music Lab, click on the multi-coloured smiley face for Song Maker.

-By clicking on the different squares, you can make different musical notes. The higher up you click, the higher the pitch!

-Clicking on the shapes below the notes allows you to add in percussion, e.g. drums and symbols.

-You can change the instruments that make the sounds, by clicking on the different options in the bottom left.

-By moving the dot along this bar (at the bottom of the page) you can change the tempo, making it faster or slower.

-This symbol lets you listen to the music that you have made!
